

Muhammad Omar Farooq

Senior Drupal Developer & Platform Architect | UN and International Development Systems

ahaomar@yahoo.com | [linkedin.com/in/ahaomar](https://www.linkedin.com/in/ahaomar) | Open to Remote Roles Globally

PROFESSIONAL SUMMARY

Senior Drupal Developer & Architect with 20+ years of experience delivering mission-critical digital infrastructure for the United Nations and major international organizations. Architected the **UN Migration Network Hub** and the **CLIMB platform for IOM**, a data-for-policy system used by G7 delegations and UN decision-makers. Contributed to the **IOM Global Migration Data Portal** (migrationdataportal.org), the UN system's primary public interface for global migration statistics. Formally recognized by **IOM Director General Antonio Vitorino** for strategic technical leadership at IMRF 2022. Expert in Drupal 8-10, PHP/Symfony, open-source architecture, AI-integrated content systems, and scalable data platforms. Delivers at the intersection of technology strategy and international development mission.

PROFESSIONAL EXPERIENCE

Senior Drupal Developer & Architect | IOM - UN Migration | Geneva, Switzerland (Remote) | Jan 2022 – Current

Technical authority for the UN system's flagship digital platforms on global migration, climate-induced displacement, and migration data intelligence.

- **UN Migration Network Hub:** Architected and developed core Drupal 10 governance platform for the UN system's Global Compact for Migration engagement, integrating dozens of UN agencies and partners within a secure, scalable ecosystem serving 195 member states and their delegations.
- **CLIMB Platform and Climate-Migration Database (IOM / Platform on Disaster Displacement):** Architected and developed the CLIMB data-for-policy platform and its integrated Human Mobility and Climate Change Database, transforming multi-source environmental displacement datasets and climate-migration research into queryable, structured intelligence for G7 delegations and UN policymakers. Full-stack Drupal build with GIS layers, interactive policy-grade visualizations, and evidence-to-decision pipelines adopted across UN agencies as a primary reference tool.
- **IOM Global Migration Data Portal (migrationdataportal.org):** Contributed to the development of key sections of IOM GMDAC's Global Migration Data Portal, the UN system's definitive public interface for comprehensive global migration statistics. Engineered interactive data dashboards and visualization modules that transform complex international migration datasets into accessible, decision-ready intelligence for policymakers, national statistics officers, and the public.
- **Director General's Recognition:** Received a formal appreciation note from IOM Director General Antonio Vitorino for strategic contributions at IMRF 2022, the first global review of the Global Compact for Migration attended by 195 member states.

Senior Drupal Architect | International Rescue Committee (IRC) | USA (Remote) | Mar 2021 – Dec 2021

Senior technical architect for digital platforms supporting Ahlan Simsim, a UNICEF-funded early childhood development programme operating across conflict-affected regions.

- **Secure Field Data Portal:** Architected and delivered a role-based data portal enabling IRC field staff to analyze programme data and optimize operations in real time, directly improving resource allocation in crisis contexts.
- **Mobile API Backend:** Engineered the full Drupal REST API backend powering the programme's mobile field application, deployed across multiple conflict-affected countries.

Technical Lead and Senior Architect | April and June GmbH | Germany (Remote) | Oct 2011 – Mar 2021

Led architecture and delivery for enterprise-scale Drupal, e-commerce, and CMS platforms across a decade of international client engagements.

- **Global Multi-Site Platform, Bionorica:** Led a 10-member engineering team to architect a Drupal 8 global multi-site platform on Pantheon, serving dozens of country and brand sites from a unified codebase with a governance model enabling non-technical regional teams.
- **E-commerce and ERP Integration:** Developed full SAP ERP-integrated e-commerce solutions covering product data pipelines, inventory management, and automated order fulfillment for multiple enterprise clients across Europe.

- **Platform Migration Strategy:** Directed the strategic migration of a client's core product configuration system from WooCommerce to Drupal, redesigning business logic and executing full data migration with zero data loss.

Principal and Senior Software Engineer | Nextbridge, Pace Solutions, Pakistan IT Zone | Pakistan | 2007 – 2011

Senior technical authority and lead software engineer across multiple firms, delivering Drupal-based platform migrations, custom B2B automation engines, and enterprise web applications for diverse client portfolios.

Software Engineer / Senior Software Engineer | Diamond Group of Industries, Punjab Board of Technical Education | Pakistan | 2002 – 2007

Architected and delivered enterprise ERP systems and academic examination platforms, driving full digital transformation at both organizations from greenfield build to production deployment.

KEY ACHIEVEMENTS

- Architected, developed and delivered six production platforms within the UN Migration ecosystem as Lead Architect, including the UN Migration Network Hub, CLIMB, the Migration Data Portal, the GCM Interactive Platform, the Repository of Practices, the Knowledge Hub, and the UN Migration Network Pledges system, collectively serving 195 member states, G7 delegations, and the global migration policy community as the technical backbone of the Global Compact for Migration.
- Led a 10-member engineering team at April and June GmbH to architect and ship a global Drupal 8 multi-site platform for Bionorica, managing dozens of country and brand sites from a single codebase across a decade of active production operation, one of the longest-running enterprise Drupal deployments in the German market.
- Developed and deployed field-critical digital systems for the International Rescue Committee in conflict-affected regions, where platform failure has direct humanitarian consequences, demonstrating the ability to deliver under the highest-stakes operational conditions in international development.
- Built and shipped enterprise digital transformation programmes across manufacturing, education, and ICT sectors before transitioning exclusively to international development platforms, bringing a rare combination of commercial-grade engineering discipline and mission-driven delivery to every UN engagement.

TECHNICAL EXPERTISE

Platform Architecture: Drupal 8/9/10, PHP 8+, Symfony, WordPress, REST APIs, Headless CMS, Multi-site Architecture

AI and Intelligent Systems: Drupal AI module ecosystem, LLM integration, automated content workflows, intelligent data analysis pipelines

Data, GIS and Visualization: MySQL, MariaDB, PostgreSQL, Apache Solr, GIS integration, interactive migration data dashboards, policy-grade data visualization, CLIMB Dashboard

Frontend Technologies: JavaScript ES6+, HTML5, CSS3/SASS, React integration

DevOps and Infrastructure: Docker, Git, CI/CD, Varnish, Redis, AWS, Pantheon, Acquia Cloud

Leadership and Governance: Technical Leadership, Agile/Scrum, Vendor Management, UN/IOM Governance Frameworks, Stakeholder Engagement

EDUCATION

Master of Computer Science (MCS) – Cum Laude

American International University, Lahore, Pakistan

2000 – 2002

Bachelor of Commerce (B.Com) – First Class

University of the Punjab, Lahore, Pakistan

1998 – 2000
